Modern and beautiful design

With smooth outlines and a neat screen, DLP Touch offers a subtle blend of modern charm and practical functionality, which makes controlling your smart home easy and intuitive.

Multifunctional

When you approach DLP Touch, it will be woken up, with operating status, temperature and time displayed on the illuminated screen. In additional to this, DLP Touch has seven pages for smart control, including one for HVAC, one for music, one for floor heating, and four for you to define.

Customizable

DLP Touch has a completely customizable
fascia. You can design control targets for your
capacitive DLP Touch, choose a cover color that
fits the best to your design, and select a suitable
icon from HDL icon gallery for each button.
What's more, each button cooperates with a
customizable indicator light.

Convenient

DLP Touch has fourteen buttons in total.
Eight touch buttons and two shifting buttons
enable you to take full control over your
home. Four shortcut buttons with visualized
icons help you reach your favorite pages,
directly and effortlessly.
