

# DuraFab® 88-08

## PTFE COATED FABRIC

FEATURES	SPECIFICATIONS	ASTM
Substrate	Woven Fiberglass	D579
Color	Black	D4969
Coating	PTFE	D4969
Thickness (in.)	0.008	D4969
Coated Weight (lbs./sq. yd.)	0.76	D3776
Tensile, Warp (PIW)	316	D828
Tensile, Fill (PIW)	214	D828
Tear, Warp (oz.)	78	D5587
Tear, Fill (oz.)	72	D5587
Elongation (%)	~3	D3759
Operating Temperature (°F)	-100 to 550	n/a
Food Safe	FDA Compliant	21CFR 170-199

Products are coated to weight. All thicknesses are nominal; typical variation is  $\pm .0005$ .

The data shown herein is intended for comparison purposes only. Values shown are based on the tests done as per PSTC as well as ASTM test methods. Values shown are the average values based on tests from many production runs. Any single roll may vary slightly from data shown. For specification purposes, it is suggested that the company should be consulted for maximum or minimum values.
