

HVAC Control

Smartly control your VRF HVAC systems

The HVAC Control solution is an intelligent control application, perfect for users who are looking to remotely control, schedule, and manage their HVAC:

Support Simplified

The HVAC Control solution enables users to obtain system status details for malfunctions and errors which can be provided to technicians and service providers for more efficient and effective service calls.

BI-Directional Real-Time Communication

The HVAC Control solution provides system status and confirmation that commands sent have been executed.

Benefits

Remote Access to all System Functions

Remote access for all system functions from anywhere in the world, including: Setpoints, Modes, Fan Speeds, Louver Control

Error Codes

Provides real-time notifications for errors and malfunctions of the HVAC unit to more efficiently have them fixed

Scheduling

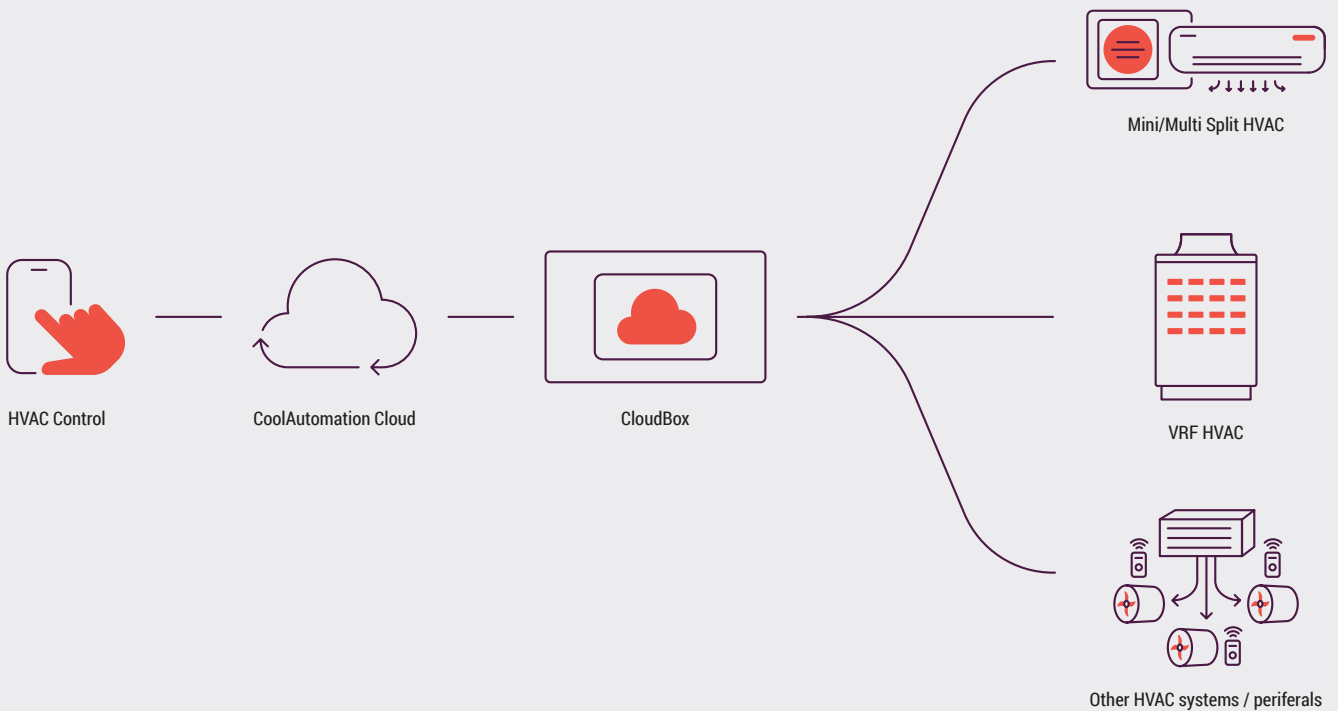

Set custom schedules to optimize the use of the HVAC unit

Usage Reports

Receive AI-based predictive notifications to keep the HVAC system running efficiently and smoothly

How Does It Work
