

BURNER CONTROL UNITS

Burner control unit BCU 570

Burner control unit BCU 570 controls, ignites and monitors individual or forced draught burners of unlimited capacity in intermittent or continuous operation.

Overview

Burner control unit BCU 570 controls, ignites and monitors individual or forced draught burners of unlimited capacity in intermittent or continuous operation. It performs central safety functions such as pressure monitoring, valve proving and pre-purge, and controls an actuator to ensure safe ignition of the burner.

Features & Benefits:

- EU certified
- It is installed on a DIN rail in the control cabinet
- Flame control with UV sensor or ionization sensor
- Mains voltage: 230 V, 50/60 Hz or 120 V, 50/60 Hz
