Honeywell

FLAME DETECTORS

Ultraviolet Flame Detector C7915

Infrared Flame Sensor

Overview

The C7915 Flame Sensor includes a lead sulfide photocell that is sensitive to the infrared radiation emitted by the combustion of fuels such as natural gas, oil, and coal.

Features & Benefits:

- Used for combination or dual-fuel applications
- Detects pilot and main flame
- Mounts quickly and easily on a standard 3/4 in. sighting pipe
- Works where flame rod or rectifying photocell mounts are difficult to apply
- The C7015 includes 110634A Bushing with magnifying lens
- The C7015 uses photoconductive lead sulfide cells 104662B and D
- The C7915 includes 50019469-001 Bushing with magnifying lens
- The C7915 uses photoconductive lead sulfide cells 32007255-001
