

三层阻燃管

Flame Retardant Compound Tube

产品特性/Product Features:

- 进口TPU环保材质，使用安全；
- 具有抗拉伸、张力强、撕裂强度高、耐磨损、耐折曲、耐低温、耐水解等特性。
- 中间铝箔层能起到导电隔热的效果，能消除积累的静电。
- 相比双层阻燃管隔热防火花阻燃效果更明显。
- 升级后的三层铝箔阻燃管，防火花焊渣效果更好，使用寿命更长。
- Imported TPU environmentally friendly material, safe to use;
- It has the characteristics of tensile resistance, strong tension, high tear strength, abrasion resistance, bending resistance, low temperature resistance, and hydrolysis resistance.
- The middle aluminum foil layer can have the effect of conducting electricity and heat insulation, and can eliminate accumulated static electricity.
- Compared with double-layer PU anti-spark tube, the effect of heat insulation, fire retardant and flame retardant is more obvious.
- The upgraded flame retardant compound tube has better fireproof welding slag effect and longer service life.

外层难燃性树脂 Flame retardant resin

中间铝箔 Aluminum foil

内层热塑性聚氨酯 Polyurethane

产品用途/Product Use:

- 焊接机器人，汽车工装夹具，夹具，自动化设备，机械厂车间，矿场。
- Welding robots, automotive fixtures, fixtures, automation equipment, machinery factory workshops, mines.

多束管

Multibeam Tube

产品特性/Product Features:

- 具有极好的耐磨性。
- 具有极好的化学性能，良好的抗震性，使用寿命长。
- 低表面电阻设计，防静电防火花飞溅。
- 可按需定制颜色，便于管路识别。
- Excellent abrasion resistance.
- Good earthquake resistance, long service life.
- Low surface resistance design, anti-static fire flower splash.
- Customer-made color is doable for easy pipeline recognition.

产品用途/Product Use:

- 水及其它流体的输送管道。
- 用于汽车、机床、化工、冶金等行业。
- 特殊使用环境。
- Water and other fluid pipelines.
- It is normally used on Auto, Machine tool, Chemical, Metallurgy etc.
- Special use environment.

气管可选颜色/Trachea Colors

Bu	B	C	Y	O	R
蓝色	黑色	透明	黄色	橘色	红色
特殊颜色需定做			Special colors to be customized		

注:根据输送介质的不同，内管可用聚氨酯、尼龙或特氟龙等不同材料。

Note: Depending on the transmission medium, the tube can be used polyurethane, nylon or Teflon different materials.
