Our Friendship Lasts Forever

Company Profile

20+ Year Professional
Experience In Printing
Industry

160+ Countries
Recognition

10000+ Customers
Admire Our Service

One-stop Printing Materials Supplier

UV Offset Printing Ink

Generally used for paper printing

310-UV

310-LED

UV Offset Printing Ink

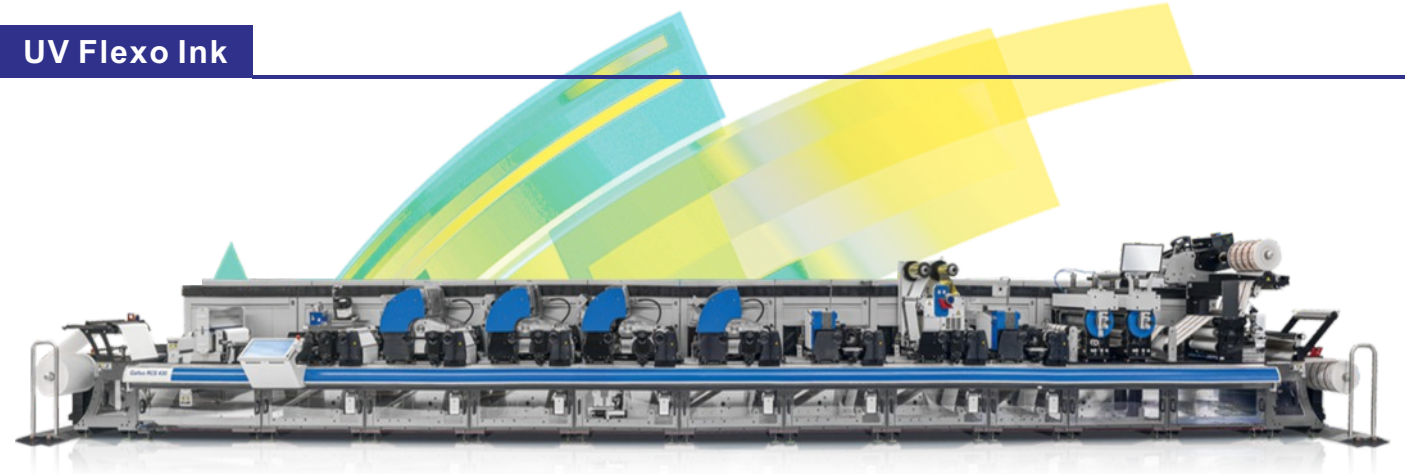

Generally used for paper and film(PP,PE,PVC).

316-UV

316-LED

UV Flexo Ink

Stronger ink transfer performance,higher color strength,and better printing density,high-definition dots,text and solids are obtained when printing on high screen line.

Features

- 1.High color strength,10-15%higher than ordinary ink.
- 2.Lower odor,suitable for odor-sensitive product packaging such as food cosmetics.
- 3.Good curing performance,suitable for high speed printing.
- 4.Suitable for various doctor blade systems.
- 5.Lower viscosity and more stable and consistent viscosity.
- 6.Excellent combination printing.
- 7.Excellent printability and dot reproduction.
- 8.Wide range of applicable materials,good adhesion to materials.
- 9.Less printing and absorption on paper materials.

Application range

- 1.In-membrane label 2.Wrapping tags 3.Various non-absorbent materials 4.Sticker
- Notes:Hot stamping and thermal transfer embossing

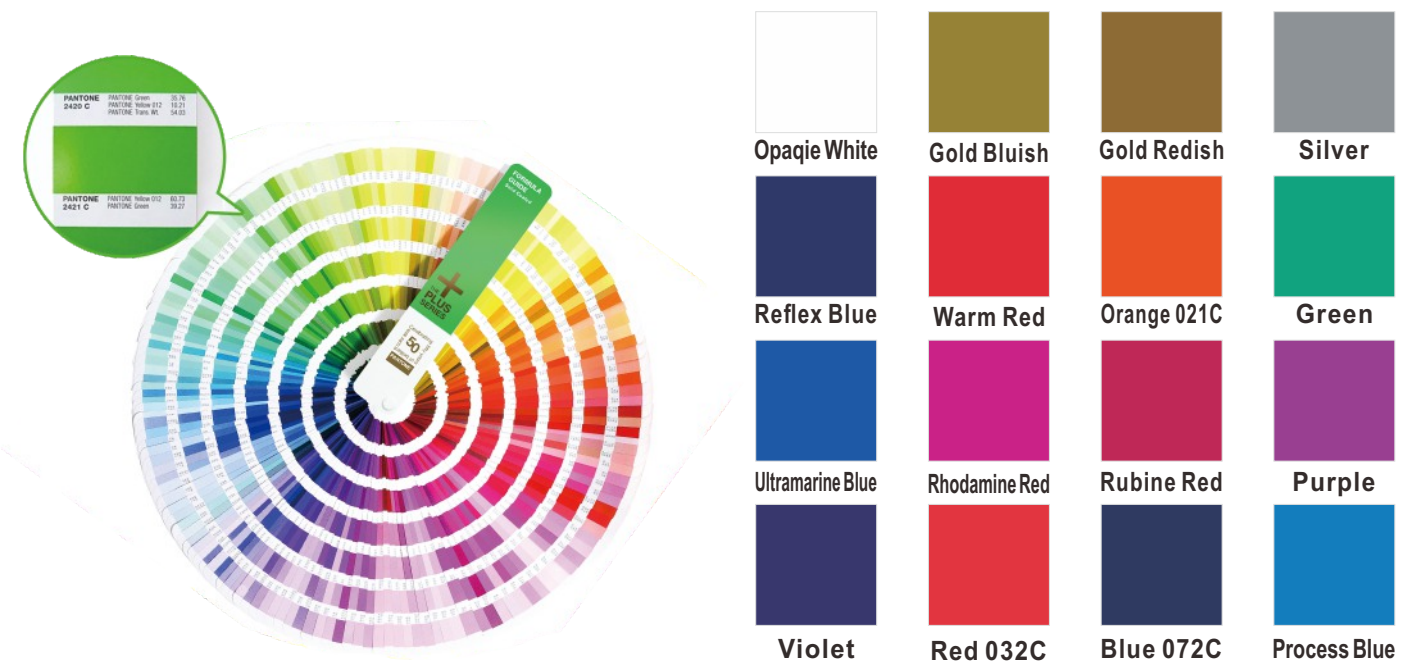

New Packaging

Lid Design:The oil nozzle cap is designed to pour ink without leakage.

Pantone spot color series

Fabric Ink

Technical Features

Odourless
High brightness
Excellent opacity
Perfect for flexographic printing
Good continuous printability
Washable after printed

35*108mm

35*108mm

Printing machine

Flexo machine

UV Screen Printing Ink

Printing method: Screen printing (Normal / UV Dry)

Application: Suitable for ABS, acrylic plexiglass, KT board, PVC, PC, PS, AS and other plastic injection molding of various transparent plastic sheets.

Membrane Switch(Mylar Ink)

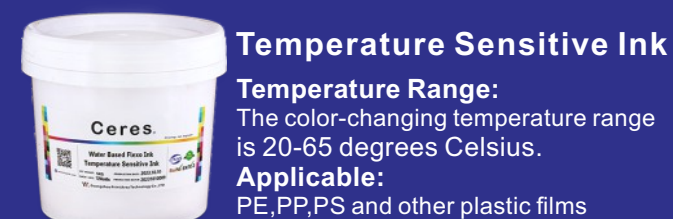

Water Base Ink

Application scope:
Food bags, Snack bags

Printing method:
Inner / Surface printing

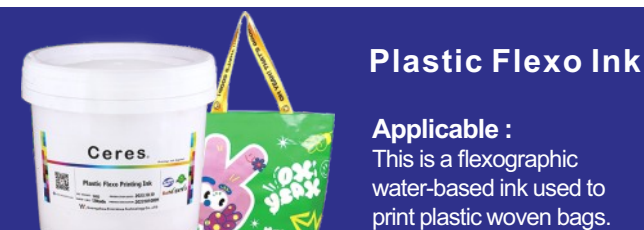

Certification standards:
ROHS,FDA,SGS

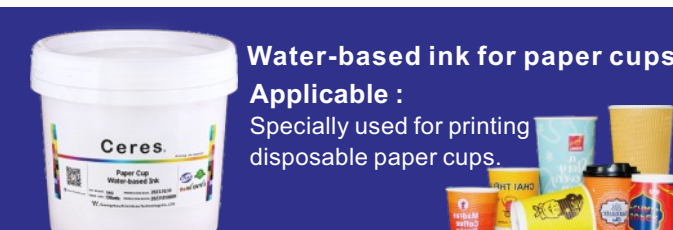

Temperature Sensitive Ink
Temperature Range:
The color-changing temperature range is 20-65 degrees Celsius.
Applicable:
PE,PP,PS and other plastic films

BOPP Flexo Ink
Application:
This is a flexographic water-based ink specially used for BOPP film printing.

Plastic Flexo Ink
Applicable :
This is a flexographic water-based ink used to print plastic woven bags.

Water-based ink for paper cups
Applicable :
Specially used for printing disposable paper cups.

A-1 Ink—Economic ink

- High Gloss
- High Color Density and Quick Dry
- Water and Rub Resistance
- Economy

YT-03 Ink—Quick Drying

- High gloss and density of color
- Fast drying, stability on printing press rich layering, good reappearance
- Water and rub resistance conforming to the standards of EN71-3, RoHS
- Eco-friendly ink for offset printing ,soy based ink

Ink on the Machine

YT-06 Ink—Melamine Ink

- Heat and sunlight resistance
- Holding color and hard to bleeding color
- Higher density of color
- Brilliant on the thinner coatings
- Conforming to the stands of EN71-3, RoHS
- Low odor and non-irritation
- High-definition mutiple printing stocks

YT-02 Ink—High Brightness

- High gloss and color density
- Quick dry, stability on printing press
- Rich layering, good reappearance of half-tones
- Water and rub resistance
- Low odor and non-skin irritation

YT-09 Ink—Eco-friendly Ink

- High gloss and color density
- Quick dry, stability on printing press
- Low odor and non-skin irritation
- Water and rub resistance
- Conforming to the standards of EN71-3, RoHS
- Rich layering, good reappearance of half-tones
- Matching color as customer request
- Excellent offset printing ink for offset printing
