| 925 Reflex Blue*(This ink will not change color) | |

Metal Decorating Ink

Two-piece Cans

Three-piece Cans

Printing method

- Offset Printing(Oven / UV Dry / UV LED Dry)

Features

- Strong adhesion to metal sheets
- Good solvent resistance
- Good Light resistance
- Good Baking resistance
- Good Cooking resistance

UV Drip off Varnish(The Best Partner)

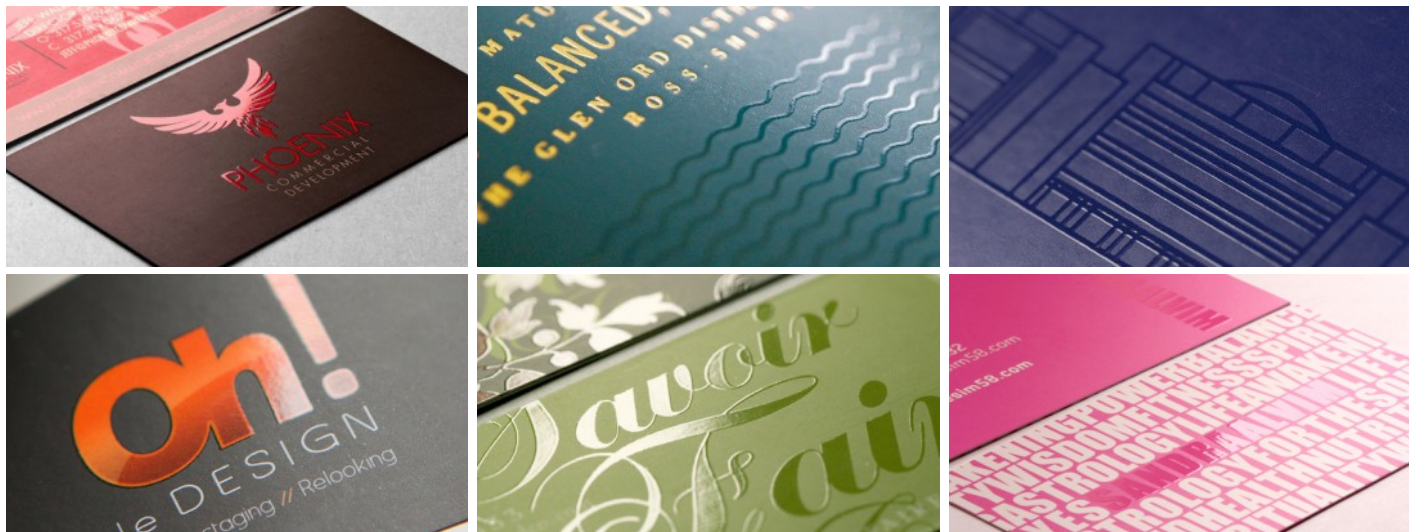

Features

- 1.Go directly hot stamping after printing.
- 2.Exquisit line 0.10mm perfect performance.
- 3.Lines interval could be controlled to a minimum 0.10mm.

- Low Odor,Good Flexibility.
- Reduce the production cost,earn more profits.

UV Varnish

Auxiliary Offset Ink

YT-500 Matt OP Varnish

- Excellent matt effect
- Fast drying
- High transparency

Packing:2.5Kg/Can 6Cans/Carton

YT-500 Gloss OP Varnish

- Higher mirror surface effect and fast drying.
- High transparency and tenacity and not easy to turn yellow.

Packing:2.5Kg/Can 6Cans/Carton

Description	Feature	Packaging	Picture
YT-300 Primer Coating for Paper	•Remedy the power dropping, wrinkle and other quality problem of the paper. • Improve printing quality	2.5Kg/Can 6Cans/Carton	
YT-901 Clear Medium	• High transparency and gloss • Not easy to yellow	2.5Kg/Can 6Cans/Carton	
YT-902 JellyCompound	• Reduce the viscosity of the ink efficiently. • Transparent jelly condition.	2.0Kg/Can 6Cans/Carton	
YT-903 Varnish	• Reduce the viscosity of the ink efficiently. • Promote the glosses and fast drying.	4.0Kg/Can	

Optical Variable Ink

Printing method: Screen printing / Flexo printing

Applications: Paper, cloth, metal, glass, ceramics, plastic and so on. Such as: currency, passport, card, tobacco, alcohol, drugs, cosmetics labels, packaging and other printed matter with high anti-counterfeiting requirements.

Golden to Green

30*50mm

Fragrance Ink

Printing method: Screen printing / Offset printing

Application: Greeting cards, postcards, children's books, tissue, etc.

Any scent can be customized for your requirements.

UV Invisible Ink

Printing method: Screen printing, offset printing, flexo printing and inkjet printer

Applications: Mainly used in currency, bills, cards, cosmetics labels, packaging, etc.

Longwave(365) Red Shortwave(265) Yellow

Before ultraviolet irradiation

Under long-wave UV (365 nm) irradiation

Under short-wave UV (265 nm) irradiation

Longwave Red Shortwave Green

Longwave Blue Shortwave Red

Longwave Green Shortwave Yellow

We can customize a broader color palette.

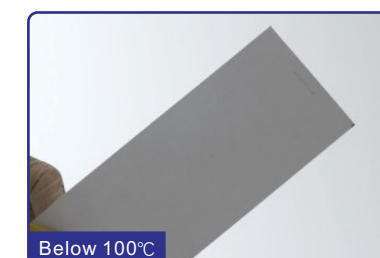

55*73mm

Temperature Sensitive Ink

Printing method: Screen printing / Flexo printing

Suitable material: Paper, cloth, plastic, metal

(Remark: Temperature sensitive inks are reversible and irreversible)

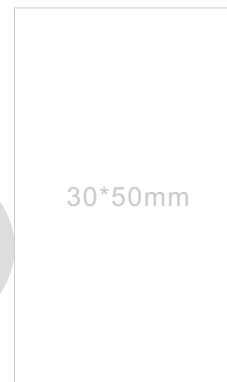

Scratch Off Ink

Gold Redish Gold Bluish Silver Black

Printing method: Screen printing / Flexo printing

Applications: Mainly used for confidential documents, code security signs, lottery tickets, lottery cards and so on.

Photochromic Ink

Printing method: Screen printing

Suitable material: Metal, cloth, paper

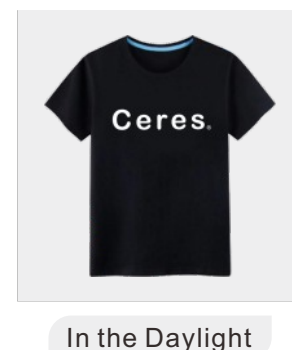

Specification: The ink in the dark light display for a specific color, after sunlight the ink into another color, in the dark light to restore the original color.

Glow In Dark Ink

Printing method: Screen printing

Application: Electrical switch, warning signal, crafts, clothing, paper, etc

In the Daylight

In the Dark

Magnetic Ink

Printing method: Screen printing/offset printing

Application: Mainly used in ticket, printing, bank passbook, ID card and other magnetic

Water Sensitive Ink

Printing method: Screen printing

Applicable material: Water cloth, umbrella, children's book, sticker label.

Water Diffusion Ink

Printing method: Screen printing

Application: Water Diffusion Ink is irreversible. Generally used for water detection or authenticity detection of electronic products.

Watermark Ink

Printing method: Screen printing and offset printing

Applications: Mainly used for books, manuals, warranty cards, certificates, invoices security.

Conductive Ink

Printing method: Screen printing

Application: For printing circuits, electrodes, electroplating substrates, keyboard contacts, and resistors.

Laser Ink

Features: Excellent adhesion, covering power, good wear resistance, full and beautiful color.

Reflective Ink

Features: Good scratch resistance, high hiding power and good adhesion

Mirror Ink

Application: Mirror ink is printed on transparent plastic sheets and glass, such as PC, PET, PVC and PMMA.

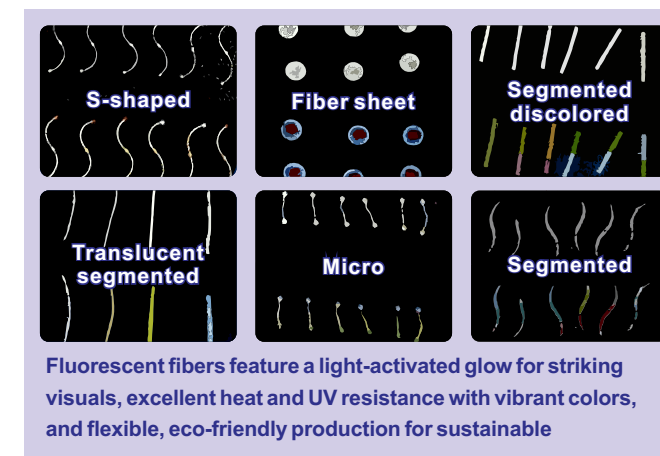

Security paper

It is mainly used in the government offices, certificates, lottery, bills, real estate contract, education department, famous brand food and clothing, medicine, cosmetics, tobacco, tea, wine, publishing industry, and so on. The security features with high-anti-counterfeiting, safety and strong confidentiality.

Watermark Paper

Color Fiber Paper

Fluorescent Fiber

Safety Thread Paper

Welcome to customize various effects of the security line paper!

Offset Rubber Blanket

① **Ceres Blanket YY-399A**(Thickness:1.95mm)

- High quality
- Excellent durability with new compressible layer and surface.

② **Ceres Blanket YY-386A**

Thickness:1.95mm

③ **Ceres Blanket YY-355A**

Thickness:1.95mm

UV Rubber Blanket

④ **Ceres Blanket YY-362A**
Thickness: 0.95mm/1.68mm/1.95mm

⑤ **Ceres Blanket YY-389A**

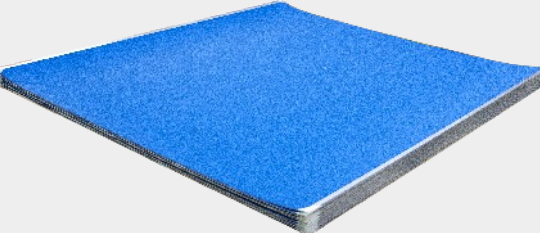

Thickness: 1.95mm

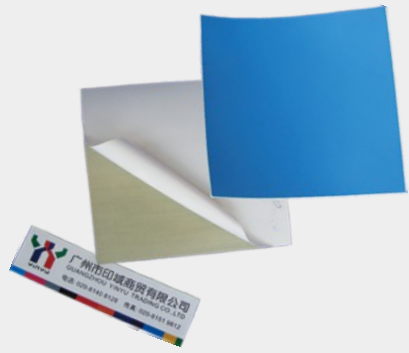

Rotary Rubber Blanket

⑥ **Ceres Blanket YY-386A**

Thickness:1.68mm

⑦ Self-Adhesive Rubber Blanket

Thickness:0.95mm/1.05mm/1.95mm

⑧ Money Printing Blanket

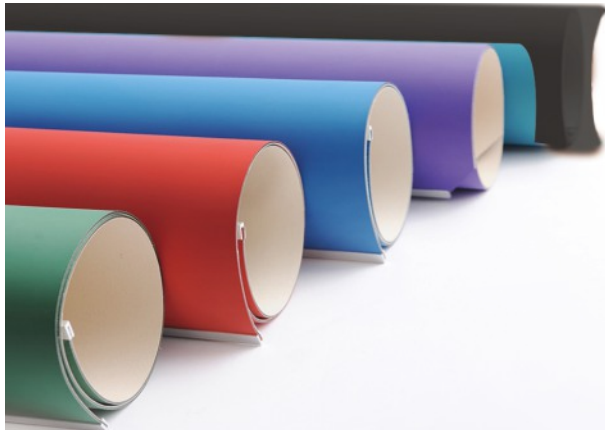

Thickness:0.5mm

⑨ Underpacking Blanket

Thickness:0.65mm/1.0mm

RUBBER BLANKET

Small Thickness Tolerance

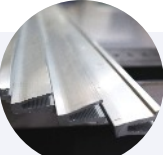

Durability

Good dot sharpness

Stable Quality

BLUANKET FACTORY

Customize different aluminum / iron bars for different model machine.

- We could offer you all kinds of printing blankets,such us UV blanket,self-adhesive blanket,high-speedsheet-fed offset blanket,web printing blanket,billprinting blanket.
- Thickness:0.95mm,1.68mm,1.95mm.
